Business Profile

DownStream Services, Inc. has been conducting business for over 34 years and is one of the leading Condition Assessment and Pipeline Rehabilitation companies in the Southwest. Founded as its own entity in 2002 following the success of the stormdrain and sewer maintenance division originated by Roberts Engineering, DownStream Services, Inc. is a certified small business enterprise which retraining over 45 employees and is recognized for its dynamic approach and professionalism within the environmental industry. Utilizing "start-of-the-art" equipment, DownStream Services Inc. is continually expanding its technology and innovation to maintain the highest level of excellence in the business.

DownStream Services, Inc. offers an array of environmental services, including Pipeline Cleaning and Hydro-jetting services, CCTV Inspection and Condition Assessment, Flow Monitoring services, Flow Monitoring, Stormwater Pollution Compliance Management, and Underground Wet and Dry Utilities. Most recently, DownStream Services, Inc. has added a unique Long Range Inspection System with both sonar and laser capabilities. With the ability to inspect up to 6,000-square feet in one run, DownStream Services, Inc. is revolutionizing the manner in which pipes are televised and assessed.

Due to the growing demand from public agencies for cost-effective pipeline rehabilitation, DownStream Services, Inc. has incorporated a new trenchless technology in its Underground Division. As an authorized installer for Reline America's Blue-Tek™ Glass Fiber Reinforced Plastic (GFRP) Liner, DownStream Services, Inc. has the capability to rehabilitate a pipe section up to 39-inches in diameter without invasive intrusion into the environment.

DownStream Services, Inc. maintains a three-acre facility located in Escondido, California, of which 4,500-square feet is dedicated solely to servicing its equipment. This inclusive machine and welding facility allows DownStream Services, Inc. to fabricate its own custom components for individual and unique projects.

DownStream Services, Inc. emphasizes continuing education and has developed an exceptional training program for its management and field crews, closely adhering to all local, State, and Federal OSHA guidelines. Our team is certified in the following areas:

- ▶ NASSCO PACP/IMACP
- ▶ Confined Space Entry
- ▶ SCBA
- ▶ Competent Persons
- ▶ Hazardous Waste Operations and Emergency Response (HAZWOPER)
- ▶ CPR|First Aid
- ▶ CWEA Collection Systems
- ▶ SWPPP Erosion and Sediment Control
- ▶ Flagger - Safe Traffic Control Practices (ATSSA)

At DownStream Services, Inc., our commitment to providing exceptional customer service is of the utmost importance. Regardless of the size or complexity of the project, our team is dedicated to giving "service" a priority. Working directly with our clients, attention is given to understanding our client's goals and objectives. Due to DownStream's scope of services, we are able to tailor unique solutions to meet our client's specific needs.
